Dravya Vasava

BACKEND-FOCUSED SOFTWARE DEVELOPER

PROFESSIONAL SUMMARY

Backend-focused developer with hands-on project experience building web applications and REST APIs using Python and Flask. Familiar with relational databases, authentication and authorization, automated testing, and deployment workflows.

DEVELOPMENT EXPERIENCE

No formal corporate or professional employment experience yet.

Independent Software Development | 2025–Present

Building practical software projects independently to apply software-engineering concepts and develop hands-on skills in backend development. Relevant project work is detailed below.

SELECTED PROJECTS

Task Manager API

Python · Flask · SQLite · JavaScript · Bootstrap · Pytest

GitHub repository: TASK-MANAGER-API1

- Implemented JWT access and refresh token authentication, role-based access control (RBAC), and permission-based authorization.
- Built task CRUD workflows with status, priority, due dates, descriptions, categories, search, filtering, sorting, and pagination.
- Added admin user/role/permission management, user-specific categories, OTP/email flows, and dashboard visualizations.
- Wrote automated tests with Pytest.

Expense Tracker V2

Python · Flask · SQLite · Jinja templates · JavaScript

GitHub repository: EXPV2_FLASK

- Implemented expense-management CRUD workflows with SQLite-backed data storage.
- Added input validation, filtering, and financial summaries.
- Organized routes, templates, and database logic.

TECHNICAL SKILLS

Languages
Python, JavaScript, SQL, HTML, CSS

Backend
Flask, REST APIs, JWT, authentication, RBAC, validation, error handling

Databases
SQLite, SQL, database design, CRUD

Testing & Tools
Pytest, Git, GitHub, deployment

Frontend
React, Jinja templates, Bootstrap, Chart.js

EDUCATION

Diploma in Computer Engineering

The Maharaja Sayajirao University of Baroda (MSU) — Polytechnic

Completed

Taking a focused year to build practical software-engineering experience before continuing formal education.

CURRENT FOCUS

Strengthening backend foundations through APIs, databases, authentication, testing, and deployment; exploring AI/ML and production AI applications.

ENGINEERING APPROACH

- Separate routes, business logic, and database operations.
- Practice automated testing and structured error handling.
- Build projects to apply concepts in working applications.
